SUSHAN D JAIN

Full-Stack Developer | React.js · Node.js · TypeScript · MongoDB

+91 80881 55097 | sushandjain@gmail.com | linkedin.com/in/sushandjain121 | github.com/sushandjain

SUMMARY

Full-Stack Developer with hands-on experience building and deploying web applications using React.js, Node.js, Express.js, TypeScript, MongoDB, and REST APIs. Built and shipped 3 full-stack applications, including a music streaming platform with 12+ REST APIs, JWT authentication, role-based access, media uploads, and progressive audio streaming. Currently working at TCS as a Systems Engineer, gaining experience working with APIs, enterprise applications, technical troubleshooting, and large-scale systems.

PROJECTS

Tunexia — Music Streaming Platform (Live) | *React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT, Tailwind CSS — Dec 2025*

- Built and deployed a full-stack music streaming platform with JWT-based authentication and role-based access control for Admin and User roles.
- Designed and implemented 12+ RESTful APIs for user management, track CRUD operations, playlists, authentication, and application workflows.
- Integrated Cloudinary and Multer for media uploads and cloud-based storage of audio and image assets.
- Implemented progressive audio streaming and real-time playback with a responsive React.js and Tailwind CSS interface.

Explore — Trucking & Booking Platform (Live) | *React.js, Node.js, Express.js, Tailwind CSS — Feb 2026*

- Built and deployed a full-stack trucking and trekking booking platform for a local business, enabling customers to explore services and submit bookings online.
- Developed responsive React.js interfaces and integrated REST APIs using Node.js and Express.js to support service discovery and booking workflows.
- Designed the application with a responsive, user-friendly interface optimized for desktop and mobile experiences.

Kheti Bazaar — Agri-Commerce Platform (GitHub) | *Node.js, Express.js, SQL, JavaScript, HTML, CSS — Nov 2024*

- Built a full-stack agricultural marketplace connecting farmers and buyers through secure authentication and role-based dashboards.
- Implemented location-based product discovery and integrated WhatsApp deep links for direct buyer-seller communication.
- Developed backend functionality using Node.js and Express.js with SQL-based data management.

EXPERIENCE

Tata Consultancy Services (TCS) — Systems Engineer | *Bengaluru, India — March 2026 – Present*

- Work with enterprise applications and REST APIs, supporting API-based application workflows and integrations within a large-scale production environment.
- Analyze API requests and responses, troubleshoot application and integration issues, and assist in identifying and resolving technical problems.
- Collaborate with cross-functional technical teams to investigate incidents, perform root-cause analysis, and maintain application reliability and availability.
- Work with structured enterprise processes for application support, incident management, system monitoring, and technical issue resolution.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Angular, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MongoDB, SQL

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Netlify

EDUCATION

Vivekananda College of Arts, Science & Commerce (Autonomous) *— 2022–2025*

Bachelor of Computer Applications (BCA) — CGPA: 8.92 / 10 | Puttur, Karnataka

JSpiders (Q/JSpider) — Hebbal *— July 2025 – Feb 2026*

MERN Full Stack Development Training Program

Manipal University Jaipur (MUJ) — Online *— Expected 2027*

Master of Computer Applications (MCA), Distance / Online Mode

ACHIEVEMENTS

- 2nd Place — TCS AI-Friday Hackathon: developed an AI-based solution that analyzes business requirements and converts them into structured, actionable data insights.
- Runner-Up — National Level Coding Competition, SDIT, Mangalore.
